## ABSTRACT OF THE DISCLOSURE

Aqueous-based compositions useful as body cleansers comprised of the following components:

- A) from about 1 to about 40% by weight of at least one nonionic alkyl polyglycoside surfactant or mixture of this surfactant with an anionic surfactant;
- B) from about 0.5 to about 15% by weight of at least one glycerol fatty acid ester;
- from about 0.25 to about 45% by weight of at least one alkoxylated glycerol fatty acid ester;
- from 0 to about 10% by weight of a thickening agent;
  - E) from 0 to about 20% by weight of an amphoteric surfactant;
  - F) from 0 to about 10% by weight of a cationic surfactant;
  - G) from 0 to about 10% by weight of a nonionic surfactant other than an alkyl polyglucoside; and
- H) water; provided that the composition contains at least about 25% by weight of water, and that when component A) includes an anionic surfactant, component F) is either not present or is a cationic surfactant which is compatible with the anionic surfactant; and wherein the percentages by weight are based in the total weight of the composition.
